

ABISMOLD is specialized in doing double-injection molding, insert mould injection molding, plastic injection molding, one cavity and multi-cavity molding, plastic mold, etc in china. Our company is capable to produce plastic parts as per your drawings/ samples, and we also enjoy good reputation among our domestic and overseas market.

CNC Precision Aluminium Die Casting with LED Lights Parts

Basic Info

Model NO.: ABIS501

Die Casting Method: Precision Die Casting

Machining: CNC Machining

Surface Preparation: Raw Finish

Tolerance Grade: 4

Weight Available: 0.02 Kg to 10 Kgs

Material Available: Stainless Steel, Carbon Steel, Aluminum Alloy, etc

Surface Treatment: Shot Blasting, Powder Coating, Chrome Plating etc

Type: Aluminium Die Casting , Die Casting Die

Services: Casting, Machining, Fabrication, Stamping etc

Specification: DME, HASCO standard, OEM design

HS Code: 84807100

Die Casting Machine Type: Cold Chamber Die Casting Machine

Application: LED Lighting

Material: Aluminum

Pressure Chamber Structure: Horizontal

Casting Surface Quality Level: 2

Process: Cold Chamber Die Casting

Lead-Time: 2-4 Weeks

Product Name: CNC Precision Aluminium Die Casting

Place of Origin: China

Trademark: OEM

Origin: Dongguan China

Product Description

This CNC turning aluminum parts / anodizing aluminum parts / machined parts are made of Aluminum alloy 6061-T6 by using precision CNC turning machine.

Aluminum Die Casting Alloys:

1. Lightweight
2. High dimensional stability for complex shapes & thin walls
3. Good Corrosion Resistance & Mechanical Properties
4. High Thermal & Electrical Conductivity
- 5 High Strength at High Temperatures
